2020 eConference Feedback

6 – 8 October 2020

Overall - did the event meet your expectations?

What was it that we did or didn't do regarding your expectations?

“Great to see co-operation between co-operatives bringing this event to life. Excellent and passionate speakers. Even without the joy of networking and meeting at the actual conference I was left buzzing at the end of each session. ”

“The personalised itineraries containing all the links for the sessions that I could attend was incredibly useful.”

“Great online event. Good communication.”

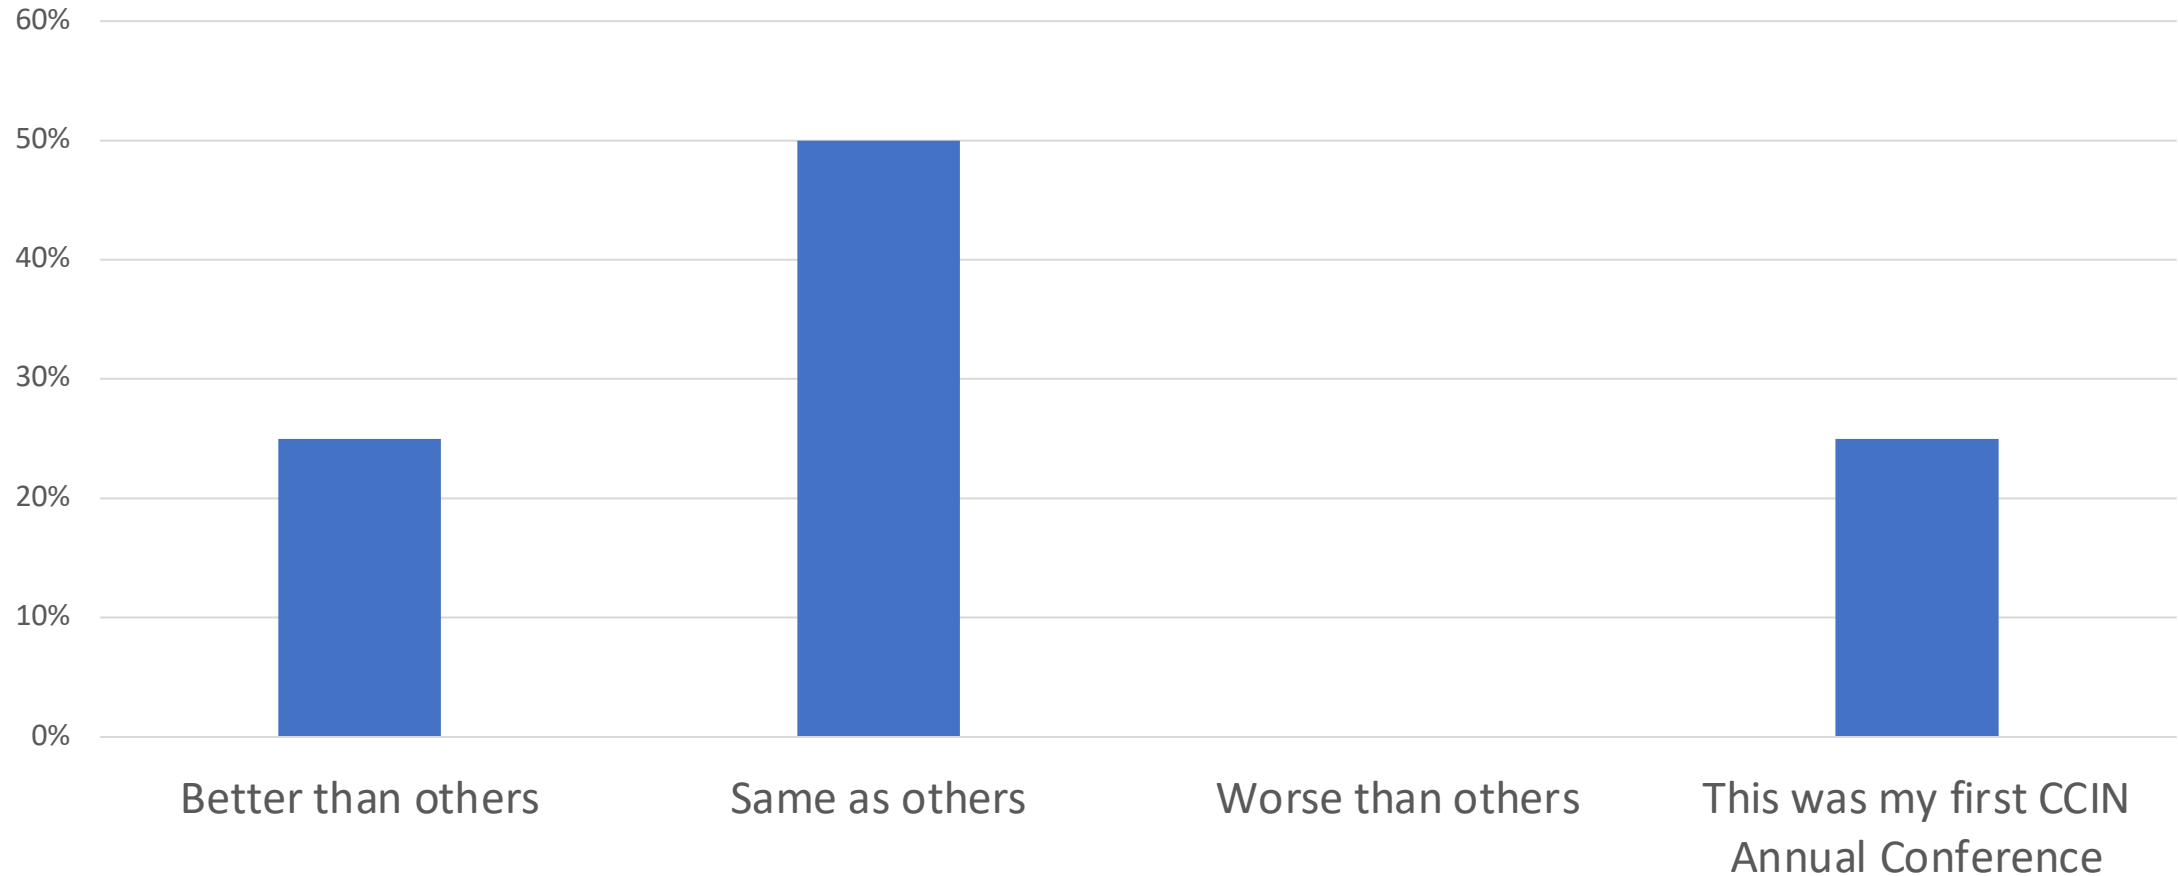

“Great mix of speakers, albeit more politized than I was expecting (especially on Day 3)”

“I was really impressed with the way the whole thing was organised - it was ambitious and confident and that really rubbed off on the participants.”

“Good opportunities to hear from co-operative councils, and also to liaise with other Affiliate Members”

“As a presenter at a workshop, the format worked well and the pre-event support was great.”

If you've attended more than one CCIN Annual Conference - how did this one compare?

What was your biggest takeaway from the 2020 Conference?

“There is a lot to do and a need to make forming a co-operative easier. Its lengthy and expensive in comparison with plcs etc.”

“Learning about the work being done by Cheshire West & Chester Council regarding online engagement with residents.”

“Working with young people is vital”

“eConference - great”

“I think it would have been so easy to cancel this but it was very clearly needed (especially the theme of the conference as well - spot on!)”

“The importance of community wealth building and 'community shares'”

“Just inspirational, really, that we can still get together and learn things, and ponder on things, and that not everything good has to be on hold because of Covid.”

“Collective engagement between Affiliates - hopefully leading to a mutual offer to the CCIN!”

“I enjoyed the passion that the presenters showed and the interest in those who attended, who submitted questions for speakers.”

The Co-operative College ran the technology for our eConference.
